

OPERATING LIQUIDITY AND RESERVE POLICY

Entity	Whitmore Products Company
Effective date	01/01/2025
Approved by	Board of Directors

The entity maintains operating cash sufficient for routine payroll, vendor, debt-service, and unexpected working-capital needs. Funds not required for near-term disbursements may be held in an interest-bearing money-market account that remains unrestricted and available on demand.

The target money-market reserve is 25% to 50% of operating cash. Management reviews forecast cash needs, debt costs, and the reserve relationship each quarter. Transfers between the two accounts require approval by an authorized officer and do not change total cash.

YEAR-END MONITORING

Operating cash	\$2,446,127.43
Money-market reserve	\$288,400.00
Reserve as a percentage of operating cash	11.790%
Policy result	Below target - documented corrective action required

Approved: /s/ Board of Directors
