AUDIT PLANNING

AUDIT PLANNING PACKET INDEX**WORKPAPER REF. PL-APPI**

PREPARED BY: _____ DATE: _____

REVIEWED BY: _____ DATE: _____

This index identifies the purpose of each reviewer-facing planning workpaper. Machine-readable registers support these documents but are not substitutes for auditor review.

WORKPAPER	PURPOSE
Financial Audit Planning Inputs	Central register of the thirty required planning inputs and their engagement-specific conclusions
Engagement Scope and Case Facts	Defines entity, period, currency, history, strategy, and evidence boundary
Engagement Calendar	Records planning, fieldwork, confirmation, subsequent-event, and reporting dates
Materiality Memo	Documents the benchmark, overall and performance materiality, posting threshold, and procedure-specific key-item policy
FSLI Scope Matrix	Separately documents quantitative, qualitative, and risk bases for cycle scope
Cycle Materiality Allocation Register	Assigns tolerable misstatement and selection thresholds to each cycle
Significance Matrix	Identifies significant customers, vendors, accounts, instruments, and other subjects
Assertion-Level Risk Assessment	Assesses inherent risk, control risk, and ROMM by relevant assertion
Significant and Fraud Risk Register	Links presumed and fact-driven risks to required responses
Accounting Policy Register	States applicable accounting policies and generated consumers
Controls and IT-IPE Strategy	Documents controls strategy and reliability of client reports used as evidence
Sampling Methodology	Documents sampling risk, method, objective, tolerable misstatement, and expected misstatement by cycle
Audit Selection Plan	Defines populations, subpopulations, assertions, extent, and selected items
Planned Procedure Register	Links assessed risks to planned nature, timing, extent, evidence, and required documentation
Procedure Window Register	Defines evidence periods and planned interim-to-year-end roll-forward windows
Related Party Register	Records identified parties or an explicit assessed-none conclusion
Unadjusted Differences Register	Starts empty at planning and is completed during fieldwork
