AUDIT STRATEGY

Controls Reliance

NO.	CYCLE / SOURCE	ASSERTIONS	ROMM	NATURE	TIMING	EXTENT	REQUIRED DOCUMENTATION
1	Cash / Cycle Audit Program	Accuracy, Completeness, Existence, Rights	Moderate	corroborative inspection, recalculation, and substantive analytics with targeted detail testing	the registered year-end procedure window with roll-forward when interim evidence is used	full-population analytics, procedure-specific targeted items, and the planned residual sample	Document whether the objective was achieved and the disposition of every exception
2	Accounts Receivable / Cycle Audit Program	Accuracy, Completeness, Cutoff, Existence, Occurrence, Rights, Valuation	High	inspection and reperformance using external or direct-source corroboration; targeted fraud and cutoff procedures	year-end or post-close, with the full registered cutoff or look-forward window	full-population analytics, procedure-specific targeted items, and the risk-adjusted residual sample; expand for every exception	Document whether the objective was achieved and the disposition of every exception
3	Ap And Accruals / Cycle Audit Program	Classification, Completeness, Cutoff, Valuation	Moderate	corroborative inspection, recalculation, and substantive analytics with targeted detail testing	the registered year-end procedure window with roll-forward when interim evidence is used	full-population analytics, procedure-specific targeted items, and the planned residual sample	Document whether the objective was achieved and the disposition of every exception
4	Inventory / Cycle Audit Program	Not applicable	Moderate	corroborative inspection, recalculation, and substantive analytics with targeted detail testing	the registered year-end procedure window with roll-forward when interim evidence is used	full-population analytics, procedure-specific targeted items, and the planned residual sample	Document whether the objective was achieved and the disposition of every exception
5	Fixed Assets / Cycle Audit Program	Classification, Existence, Rights, Valuation	Moderate	corroborative inspection, recalculation, and substantive analytics with targeted detail testing	the registered year-end procedure window with roll-forward when interim evidence is used	full-population analytics, procedure-specific targeted items, and the planned residual sample	Document whether the objective was achieved and the disposition of every exception
6	Debt / Cycle Audit Program	Classification, Completeness, Rights, Valuation	Moderate	corroborative inspection, recalculation, and substantive analytics with targeted detail testing	the registered year-end procedure window with roll-forward when interim evidence is used	full-population analytics, procedure-specific targeted items, and the planned residual sample	Document whether the objective was achieved and the disposition of every exception
7	Journal Entries / Cycle Audit Program	Accuracy, Classification, Completeness, Occurrence	High	inspection and reperformance using external or direct-source corroboration; targeted fraud and cutoff procedures	year-end or post-close, with the full registered cutoff or look-forward window	full-population analytics, procedure-specific targeted items, and the risk-adjusted residual sample; expand for every exception	Document whether the objective was achieved and the disposition of every exception
8	Prepays / Cycle Audit Program	Classification, Existence, Rights, Valuation	Moderate	corroborative inspection, recalculation, and substantive analytics with targeted detail testing	the registered year-end procedure window with roll-forward when interim evidence is used	full-population analytics, procedure-specific targeted items, and the planned residual sample	Document whether the objective was achieved and the disposition of every exception

NO.	CYCLE / SOURCE	ASSERTIONS	ROMM	NATURE	TIMING	EXTENT	REQUIRED DOCUMENTATION
9	Revenue / Cycle Audit Program	Accuracy, Completeness, Cutoff, Existence, Occurrence, Rights, Valuation	High	inspection and reperformance using external or direct-source corroboration; targeted fraud and cutoff procedures	year-end or post-close, with the full registered cutoff or look-forward window	full-population analytics, procedure-specific targeted items, and the risk-adjusted residual sample; expand for every exception	Document whether the objective was achieved and the disposition of every exception
10	Equity / Cycle Audit Program	Classification, Completeness, Existence, Rights	Moderate	corroborative inspection, recalculation, and substantive analytics with targeted detail testing	the registered year-end procedure window with roll-forward when interim evidence is used	full-population analytics, procedure-specific targeted items, and the planned residual sample	Document whether the objective was achieved and the disposition of every exception
11	Payroll / Cycle Audit Program	Accuracy, Completeness, Cutoff, Existence, Occurrence, Rights, Valuation	High	inspection and reperformance using external or direct-source corroboration; targeted fraud and cutoff procedures	year-end or post-close, with the full registered cutoff or look-forward window	full-population analytics, procedure-specific targeted items, and the risk-adjusted residual sample; expand for every exception	Document whether the objective was achieved and the disposition of every exception
12	Opening Balances / Cycle Audit Program	Not applicable	Moderate	corroborative inspection, recalculation, and substantive analytics with targeted detail testing	the registered year-end procedure window with roll-forward when interim evidence is used	full-population analytics, procedure-specific targeted items, and the planned residual sample	Document whether the objective was achieved and the disposition of every exception
13	Journal Entries / Significant-Risk Response	Accuracy, Classification, Completeness, Occurrence	High	Test journal-entry population completeness, manual and late entries, estimates, and unusual transactions.	year end and the applicable cutoff window	all qualitatively risky items plus the risk-calibrated selection	Document the linked significant-risk conclusion and disposition of every fraud or material exception
14	Journal Entries / Significant-Risk Response	Accuracy, Classification, Completeness, Occurrence	High	Select an unpredictable journal-entry stratum not disclosed to management in advance.	year end and the applicable cutoff window	all qualitatively risky items plus the risk-calibrated selection	Document the linked significant-risk conclusion and disposition of every fraud or material exception
15	Revenue / Significant-Risk Response	Accuracy, Completeness, Cutoff, Existence, Occurrence, Rights, Valuation	High	Corroborate staffing service and unbilled revenue to source evidence and test year-end cutoff and unusual terms.	year end and the applicable cutoff window	all qualitatively risky items plus the risk-calibrated selection	Document the linked significant-risk conclusion and disposition of every fraud or material exception
16	Revenue / Significant-Risk Response	Accuracy, Completeness, Cutoff, Existence, Occurrence, Rights, Valuation	High	Select an unpredictable staffing service and unbilled revenue stratum, location, or period.	year end and the applicable cutoff window	all qualitatively risky items plus the risk-calibrated selection	Document the linked significant-risk conclusion and disposition of every fraud or material exception
17	Revenue / Significant-Risk Response	Accuracy, Completeness, Cutoff, Existence, Occurrence, Rights, Valuation	High	Reconcile approved time to invoices, payroll, rates, overtime, and period-end accruals.	year end and the applicable cutoff window	all qualitatively risky items plus the risk-calibrated selection	Document the linked significant-risk conclusion and disposition of every fraud or material exception
18	Payroll / Significant-Risk Response	Accuracy, Completeness, Cutoff, Existence, Occurrence, Rights, Valuation	High	Reconcile approved time to invoices, payroll, rates, overtime, and period-end accruals.	year end and the applicable cutoff window	all qualitatively risky items plus the risk-calibrated selection	Document the linked significant-risk conclusion and disposition of every fraud or material exception

NO.	CYCLE / SOURCE	ASSERTIONS	ROMM	NATURE	TIMING	EXTENT	REQUIRED DOCUMENTATION
19	Opening Balances / Opening-Balance Procedure	Not applicable	Moderate	corroborative inspection, recalculation, and substantive analytics with targeted detail testing	the registered year-end procedure window with roll-forward when interim evidence is used	full-population analytics, procedure-specific targeted items, and the planned residual sample	Document whether the objective was achieved and the disposition of every exception
20	Opening Balances / Opening-Balance Procedure	Not applicable	Moderate	corroborative inspection, recalculation, and substantive analytics with targeted detail testing	the registered year-end procedure window with roll-forward when interim evidence is used	full-population analytics, procedure-specific targeted items, and the planned residual sample	Document whether the objective was achieved and the disposition of every exception
21	Opening Balances / Opening-Balance Procedure	Not applicable	Moderate	corroborative inspection, recalculation, and substantive analytics with targeted detail testing	the registered year-end procedure window with roll-forward when interim evidence is used	full-population analytics, procedure-specific targeted items, and the planned residual sample	Document whether the objective was achieved and the disposition of every exception
22	Opening Balances / Opening-Balance Procedure	Not applicable	Moderate	corroborative inspection, recalculation, and substantive analytics with targeted detail testing	the registered year-end procedure window with roll-forward when interim evidence is used	full-population analytics, procedure-specific targeted items, and the planned residual sample	Document whether the objective was achieved and the disposition of every exception
23	Opening Balances / Opening-Balance Procedure	Not applicable	Moderate	corroborative inspection, recalculation, and substantive analytics with targeted detail testing	the registered year-end procedure window with roll-forward when interim evidence is used	full-population analytics, procedure-specific targeted items, and the planned residual sample	Document whether the objective was achieved and the disposition of every exception
24	Opening Balances / Opening-Balance Procedure	Not applicable	Moderate	corroborative inspection, recalculation, and substantive analytics with targeted detail testing	the registered year-end procedure window with roll-forward when interim evidence is used	full-population analytics, procedure-specific targeted items, and the planned residual sample	Document whether the objective was achieved and the disposition of every exception
25	Opening Balances / Opening-Balance Procedure	Not applicable	Moderate	corroborative inspection, recalculation, and substantive analytics with targeted detail testing	the registered year-end procedure window with roll-forward when interim evidence is used	full-population analytics, procedure-specific targeted items, and the planned residual sample	Document whether the objective was achieved and the disposition of every exception
